

ECOS-EURISOL Joint Town Meeting

Institut de Physique Nucléaire, Orsay

EURISOL

October 28-31, 2014

First Circular

<http://ecos-eurisol14.sciencesconf.org/>

I General Purpose: The ENSAR contract will end on Dec. 31, 2014. In order to conclude the activities of two of the ENSAR networks, ECOS (stable beams) and EURISOL-NET (radioactive ISOL beams) a joint town meeting will be organized in Orsay on Oct. 28-31, 2014. Invited talks will summarize the activities of the two networks and round table discussions on the future of stable and ISOL beams in Europe will be organized. The detailed scientific program will be given in the second circular.

II ECOS: The ECOS part of the town meeting will start on Oct. 28 at 13:30 and run until Oct. 29 at 18:00. The primary aims of the ECOS town meeting is to discuss the various deliverables that are part of the ENSAR contract. In addition to the presentations and discussions related to the European strategy on Super Heavy research and on the synergy between European stable ion beam facilities, technical and scientific highlights and future prospects will be presented for the various major stable ions beam facilities in Europe. A round table will be organized during the last session of the meeting for the discussion of how the ECOS initiative and Net Work activities within ENSAR could evolve in the future. An active participation will be key to a successful outcome of the meeting.

III EURISOL-NET: The EURISOL-NET part of the town meeting will start on Oct. 30 at 9:00 and run until Oct. 31 at 13:00. Subjects presented will include recent developments of the main components of ISOL facilities (Targets, Ion Sources, neutron converters, separators, LINACs...) and reviews of future physics topics and instrumentation for ISOL facilities, based on the topical meetings organized during the ENSAR contract. The round table discussion will focus on the future of the EURISOL concept and the opportunity of proceeding with a first phase of EURISOL as a distributed facility between the current and future European ISOL facilities. Your input is important!

IV Venue: The talks will take place in the Irène Joliot-Curie auditorium at Institut de Physique Nucléaire in Orsay, France. Orsay (station Orsay-Ville) is directly linked to Paris and both Orly and CDG airports by the RER line B (www.ratp.fr). Practical information about reaching Orsay and finding lodging in the area can be found at <http://ipnwww.in2p3.fr/Infos-pratiques>.

V Registration and accommodation: Registration is open on the meeting website <http://ecos-eurisol14.sciencesconf.org/> until **Oct. 14, 2014** and is free of charge. Note that you must "create an account" before registering. One may register for one or both parts of the TM by indicating the corresponding arrival and departure dates. Participants are requested to book their own accommodation; some reasonably priced hotels are suggested on the website. Coffee breaks will be offered. Lunch will be available for purchase at the Orsay University canteen. A **social dinner in Paris** will be offered to all participants on Wednesday evening October 29, details will be given in the second circular.

VI Second circular: A second circular including the detailed scientific program will be issued on Oct. 1.

VII Contact information: Queries concerning the scientific program can be made to Faïçal Azaiez (azaiez@ipno.in2p3.fr) or Yorick Blumenfeld (yorick@ipno.in2p3.fr). Questions on practical matters should be addressed to Valérie Frois (frois@ipno.in2p3.fr) .

Looking forward to welcoming you in Orsay,

Faïçal Azaiez and Yorick Blumenfeld
